Width/Size:	Broadloom 3.66	50 X 50cm	50 X 50cm
VOC Rating:	Meets requirements green star rating (GBCSA criteria)		
Country of Origin	Manufactured in South Africa from local raw materials.		

EARTH

Barcode earth is available in broadloom, plain back tiles and Enduroback KR4® (modified recycled bitumen) tiles.

The top cloth is manufactured from a blend of virgin and recycled PFX Stain Shield fibres, and by recycling fibres Van Dyck Floors reduces energy and global warming effects and ensures that the waste doesn't end up in landfills.

All our fibres are sourced from PFE Extrusion, a sister company of Van Dyck Floors, and both factories are based around Durban and are ISO 14001 certified and committed to environmentally friendly manufacturing processes. Van Dyck Floors is also ISO 14064 (Greenhouse Gas Verification) certified, and by measuring our emissions we have been able to reduce our carbon footprint by more than 40% over the past 4 years.

Other benefits of this product include improved acoustics, thermal insulation and anti-fatigue properties.

Our Enduroback KR4® (modified recycled bitumen) backing is made mainly from post-industrial recycled content and its strength and durability ensures a very long life span.

In conclusion, Van Dyck Floors' Earth Collection is guaranteed to be one of the most environmentally friendly products on the market.

ATHOS

While every effort has been made to replicate colours in print, some slight variance may occur. Please refer to sample swatches for accurate colour references.

BILL OF QUANTITIES

Broadloom, Plainback, Enduroback KR4® (Modified Recycled Bitumen) Tiles: BARCODE EARTH made from 100% PFX Stain Shield Staple Fibre in (colour name), by Van Dyck Floors, laid in accordance with the code of practice for the installation of textile floor coverings (SANS 10186).

COLOUR VARIANCE

Care must be taken when ordering or installing carpeting in individual areas, as carpeting, like all textile products, is subject to shade variation between batches.

CAUTION:

Colour fastness to light: Dyes are selected for their performance and repeatability to commercial standards, but colours can fade when exposed to harsh, direct sunlight. Adequate precautions must be taken to protect the carpet against such exposure to prevent premature fading or damage.

FURNITURE

Place protectors or carpet off-cuts under furniture to prevent crushing of carpet pile and eventual damage to the backing. Rearrange furniture from time to time to allow pile to recover and change traffic paths. Use carpet protector mats for chairs with castor wheels.

SATISFACTION

Due to dye lot variations and machine settings, actual material may vary from the sample. However, this variation is kept within exacting standards as laid down by SANS 1415. Construction of some carpet may involve the occurrence of shift lines across the width of the carpet. Certain light sources shining across the surface may emphasise the effect of shadow lines. These are not a manufacturing defect and will not detract from the carpet's performance.

Maintenance

Enhance the performance and appearance of your carpet by following these steps: • Use quality Dirt Off walk off mats. • Vacuum thoroughly and frequently. • Remove spills and marks immediately. • General clean by a SETA Qualified Cleaner.

>> Helpful Hint

Whilst the light colours in the range are extremely attractive, they are high maintenance. They show soil quicker than darker colours and need frequent cleaning. We accept no liability on soiling, as this is maintenance related and not a manufacturing defect.
